SUMMARY

Passionate data science student with a strong background in data analytics, statistical modeling, and machine learning. Skilled in Python, data visualization tools, and various data science libraries. Excellent problem-solving, research, and collaboration skills. Eager to gain insights and take on the challenge of driving decision-making through data-driven solutions.

TECHNICAL SKILLS

Programming Languages: Python, C, SQL

Libraries & Tools: NumPy, Pandas, Git

PROJECTS

Air Line Reservation System
Mern stack web development project
- Users to find available flights based on criteria such as date, destination, and departure location.
- Provides users with the option to choose preferred seats during the booking process.
- Javascript, Css

Event Management System
Enterprise Programming
- Event Scheduling: Create, update, and manage event schedules with ease.
- Participant Management: Register participants, track attendance, and manage participant details
- Java, css

EXPERIENCE

Cloud Computing Intern   2022 – 2023
AICTE   *INDIA*
- Provided development teams with software architecture as a Cloud Intern
- Applied cloud and distributed systems expertise while collaborating with team members

Data Engineering Intern   2023 – 2024
AICTE   *INDIA*
- Developed and implemented processes and structures for data engineering tasks
- Designed, developed, tested, and deployed data pipelines and systems to support decision-making

EDUCATION

Koneru Lakshmaiah Education Foundation   Vijayawada, India
Bachelor of Technology in Computer Science and Engineering   *2022 – 2026*

Sahasra Junior College   Kakinada,India
Intermediate   *2020 - 2022*
Narayana Olympiad School SSC

CERTIFICATIONS

- AWS Cloud Practitioner
- RED HAT EX183
- Salesforce
